

WolfCafe - Use Case 14

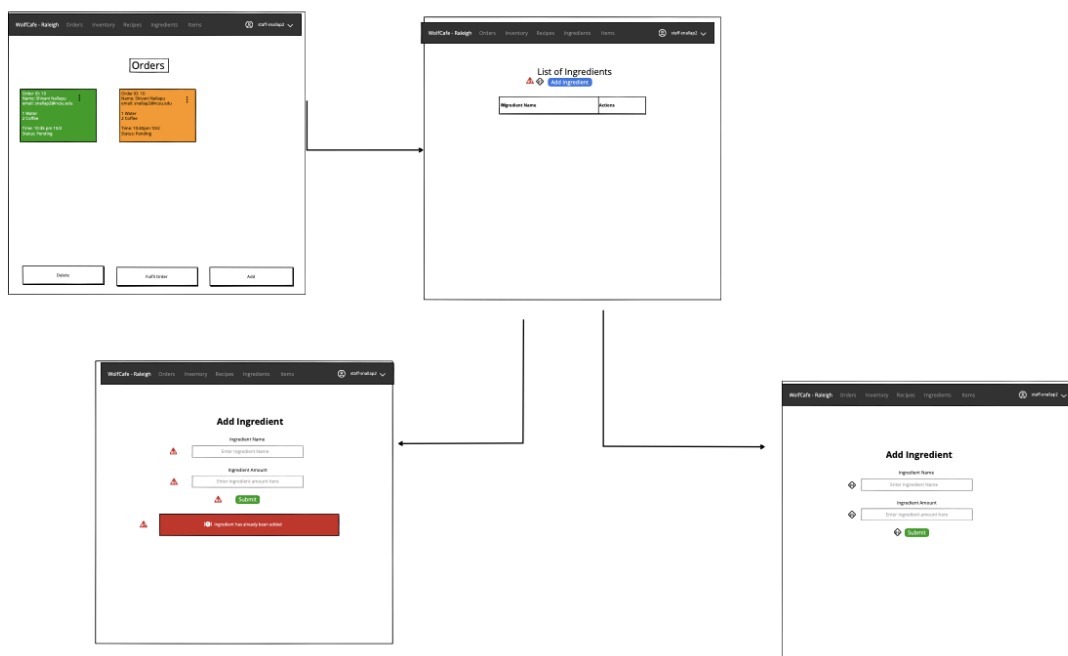

“Add New Ingredients to Inventory”

Design Decisions (frontend, backend)

The frontend for this use case is similar to that of Coffee Maker. The only difference is that now our system has both ingredients and an item inventory, so for the frontend, we created two separate tables to make the system more organized. The system still uses color, words, and symbols to accommodate the visually impaired.

Frontend Elements

Original Design (**SAME AS UPDATED DESIGN**)

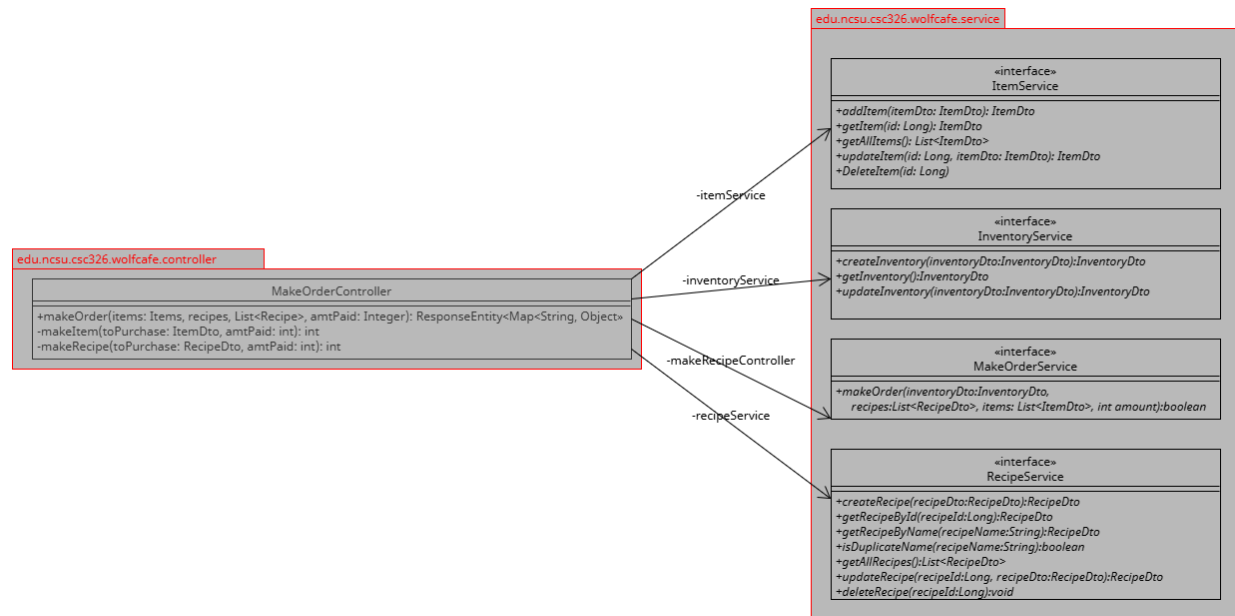

Changelog

- Since it's iteration 1A we did not change anything

Backend Elements

Class Diagrams -

Original Design (**SAME AS UPDATED DESIGN**)
