

WolfCafe - Use Case 13

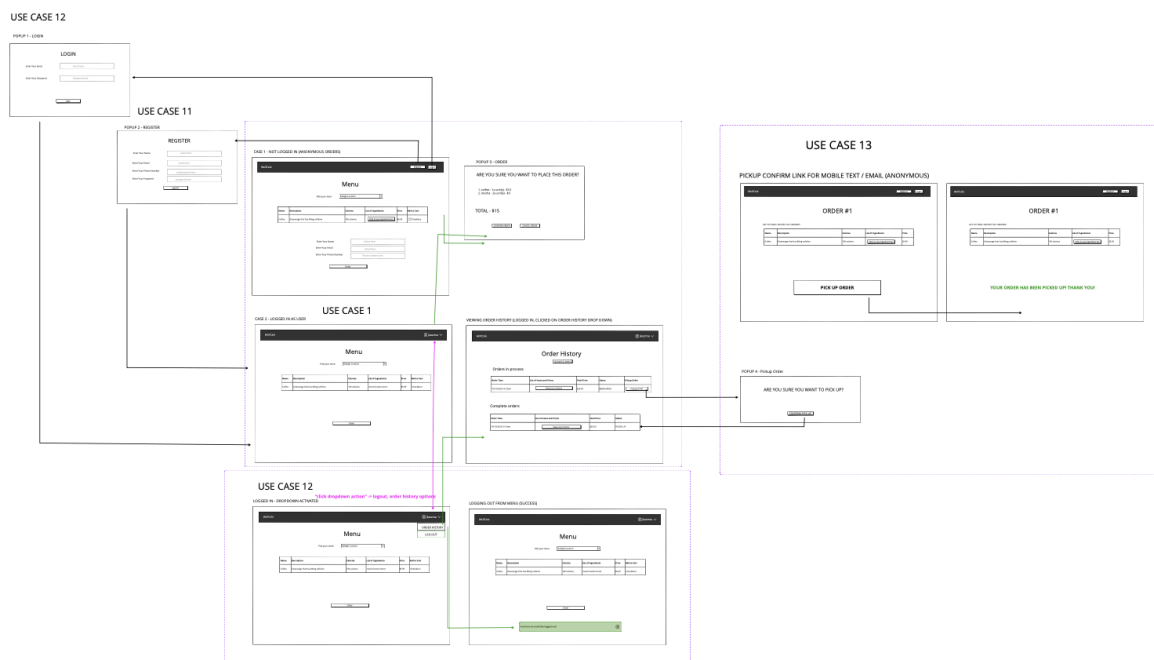

“Order Pickup”

Design Decisions (frontend, backend)

Customers will confirm the pickup of an order on the “Order Log” page. Two lists will be presented, the active orders on top and the order history of that use below. The active order will have a status of “In Progress” or “Ready” and once it is ready the customer will select “Picked Up Order” and the order will be moved to the history and a status of “Picked Up.” Other inactive statuses will be “Cancelled” or “No Pickup.” The staff will set the order to ready for customer pickup. The changes made here to the backend will be minimal, only status changes are observed when inside this functionality.

Frontend Elements

Original Design (**SAME AS UPDATED DESIGN**)

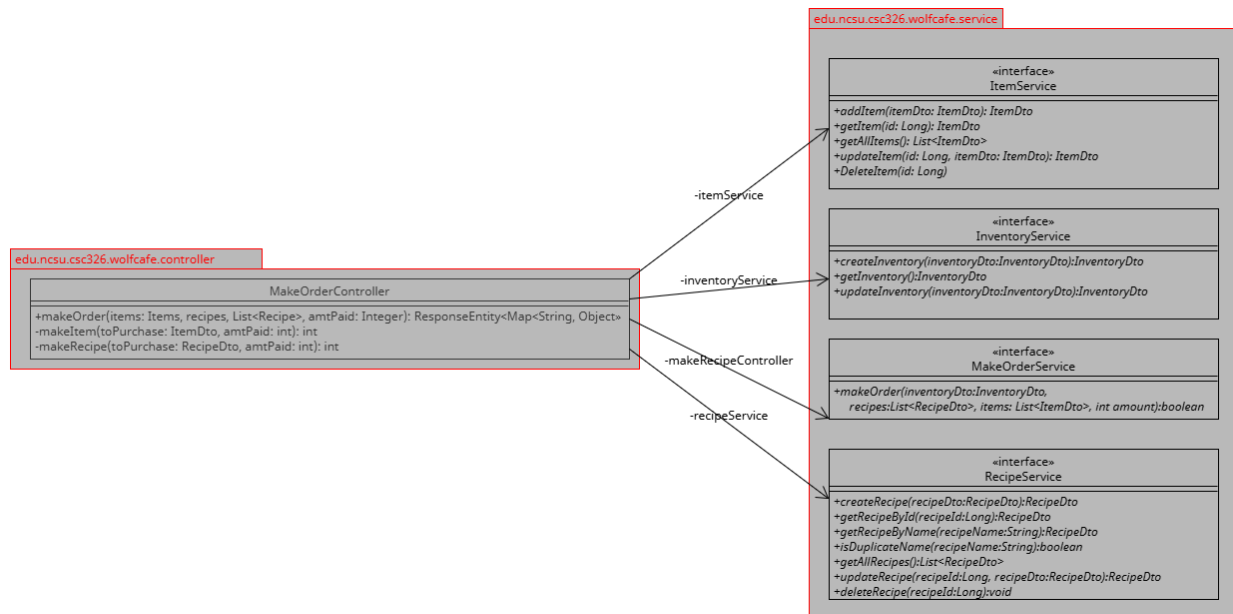

Changelog

- Since it's iteration 1A we did not change anything

Backend Elements
