

UC 7- Admin adds new staff to the system

Design Decisions

Frontend Decisions

The system organizes the list of staff as a table to keep the relevant information for each staff member well-structured. The "Add Staff Member" button is placed at the top to make this action easy to find, as it will likely be a common task. The display for adding a new staff member is similar to that of adding a new ingredient, except with different inputs, because we felt the layout should be consistent across the system. The tabs for the admin layout are Staff, Customers, and Tax, which capture all the relevant information an admin needs access to.
